

### **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

Claims 1-31 (canceled)

Claim 32 (currently amended): An alignable label form for a folder with an edge having a curvature, comprising:

a label having a central split line;

a backing member applied to the label and having a split line;

an alignment section surrounding at least part of the label and separable therefrom, the alignment section separable from the label, and including an edge shaped generally to conform to ~~an~~ the curved edge of a the folder;

wherein when one portion of the backing member is removed, one half of the label is exposed along with the shaped edge so that the label may be maintained in alignment with the folder by engagement of the shaped section with the curved edge of the folder, while the exposed side of the label is affixed to the folder.

Claim 33 (previously presented): The label form of claim 32, wherein the shaped section is proximate at least one end of the label.

Claim 34 (previously presented): A method of applying a label form to the edge of a folder, the label form having a label and an separable alignment section surrounding at least part of the label, comprising:

removing a label from a backing member by separating the backing member along a split line;

aligning a shaped edge of the alignment section to a like edge of the folder;

applying the label to the edge of the folder;

peeling off the backing member along the split line; and

folding the label over the edge of the folder.

Claim 35 (previously presented): The method of claim 34, wherein the label includes a top side adapted for being printed on.

Claim 36 (new): The method of claim 34, wherein the shaped edge is "S"-shaped.

Claim 37 (new): The label form of claim 32, wherein the shaped section is "S"-shaped.
